Education

Osaka University <i>PhD Computer Science, MEXT Scholarship</i>	2024 - present
Osaka University <i>Research Student, MEXT Scholarship</i>	2023 - 2024
Ateneo de Manila University <i>MS Computer Science, Ateneo Freshmen Merit Scholarship</i>	2022 – 2023
Ateneo de Manila University <i>BS Computer Science, Magna Cum Laude, Ateneo Freshmen Merit Scholarship</i>	2018 – 2022

Publications

Data leakage in Visual Datasets <i>Patrick Ramos*, Ryan Ramos*, and Noa Garcia</i>	ICCVW 2025
No Annotations for Object Detection in Art through Stable Diffusion <i>Patrick Ramos, Nicolas Gonthier, Selina Khan, Yuta Nakashima, and Noa Garcia</i>	WACV 2025
Knowledge Distillation with Relative Representations for Image Representation Learning <i>Patrick Ramos, Raphael Alampay, and Patricia Abu</i>	CORES 2023
Emotion analysis of Writers and Readers of Japanese Tweets on Vaccinations <i>Patrick Ramos, Kiki Ferawati, Kongmeng Liew, Eiji Aramaki, and Shoko Wakamiya.</i>	ACLW 2022

*co-first authorship

Work Experience

Research Intern <i>Social Computing Laboratory, Nara Institute of Science and Technology</i> Conducted research comparing inferred emotions of writers and readers of Japanese Tweets on vaccinations to Japanese vaccination measures by fine-tuning a BERT	Jan 2022
Research Intern <i>Ateneo Laboratory for Intelligent Visual Environment, Ateneo de Manila University</i> Conducted research on the use of the DETR object detection framework with Transformer and MLP-based backbones for medical mask detection	Jul 2021 – Aug 2021

Research Interests

Vision/vision-language model applications I find interest in applying vision and vision-language foundation models to data-scarce tasks (WACV 2025)

Dataset auditing I am interested in understanding how the training data used to train vision models can inflate or deflate evaluation results when it accidentally contains test data (ICCVW 2025)

Skills

Implementing research ideas in Python All my research revolves around deep learning and hence all of my projects are implemented in Python. I have several years of experiments implementing and evaluating models using PyTorch, timm, Hugging Face, and Lightning.

Data processing As part of my research I often inspect, clean, and transform data using NumPy and Polars

Data visualization I visualize results in my research for internal and external presentations using Matplotlib and Plotly

Paper reading I do my best to keep up to date with the latest research trends by maintaining a research feed and further reading papers that interest me
